(OSHPD)***

The MIRCAl of Quality Data

Log on to MIRCAl and submit your
inpatient data file to OSHPD

MIRCAl processes your data:

Transmittal validation

License Check

Grouper

Edit Programs

TRANSMITTAL VALIDATION

- ✓ Virus infected files
- ✓ No data within the file
- ✓ Incorrect file format

~~~~~

- ✓ Discrepancy in number of records
- ✓ “Invalid” discharge dates
- ✓ Incorrect facility ID number

**File is rejected if it fails any of these validations and will NOT be processed further**

# **LICENSE CHECK**

**Does report match licensing information?**

- ✓ All licensed Types of Care reported
- ✓ ED Services- admits through your ED?

**Data will NOT be processed further if they fail the license check**

# **GROUPER**

Groupier assigns the DRG and MDC

# **MIRCal**

## **Edit Programs**

# Edit Programs

- ◆ Trend Edits
- ◆ Comparative Edits
- ◆ Ungroupable Records (DRG 470)
- ◆ Standard Edits
- ◆ Coding Edits
- ◆ Re-Admission Edits
- ◆ Exception Edits

# TREND EDITS

- Compare current data reported against historical data (past two report periods)
- Check the percentage of increase or decrease in each data element category
- If the difference is significant, then data are rejected
- If the difference is verified, override is enabled

# TREND EDITS

## Example:

- Patient Disposition “Routine” is reported as 35%
- The historical percentage reported was 50%
- Difference of 15% (decrease)

## Result:

- Data failed this edit

# TREND EDITS

Trend Edits are identified by a T or TW Flag

- **T flag: Critical error-- data fails**
- **TW flag: Non-critical error (or warning flag) and will not fail**

*Trend Edit Summary Report* displays the data element categories that have T or TW flags

One or more T-Flags will cause the data to fail the Trend Edit Program

# COMPARATIVE EDITS

- Affects current report period data only
- Edits both numbers and percentages reported in each data element category and compares against the total number of records reported
- Checks distribution of data within each of the data element categories

# COMPARATIVE EDITS

- Edits range from 100% reported to 'No Data' reported in any one of the data element categories
- MIRCal edits 'Unknown' and 'Other' data element categories -- based on the number of discharges reported

# COMPARATIVE EDITS

Examples of Comparative Edits:

C015 100% of records reported with  
Patient Disposition as Against Medical  
Advice

C022 No Principal Procedures  
Reported

# COMPARATIVE EDITS

- Comparative Edits are identified by a C Flag
- The *Comparative Edit Summary Report* displays the C-Flags by data element category
- One or more C-Flags will cause the data to fail the Comparative Edit Program

# UNGROUPABLE RECORDS

- Checks for records that grouped to DRG 470
- DRG 470's are identified by S Flags

## Examples:

- **S901 - Blank or Invalid Principal Diagnosis**
- **S903 - Age is less than 0 or greater than 124 yrs old**

If your data fail this edit program, correction or verification would be necessary

# STANDARD EDITS

Standard Edit Program checks for blank, invalid, or illogical data

Standard Edit errors are identified by S flags

- **S001 - Blank** (was the B flag)
- **S002 - Invalid** (was the \* flag)
- **S018 - Duplicate ICD-9-CM Code** (was the T flag)

ETL: Data will fail the Standard Edit Program if the percentage of records with S flags is greater than 2%

# CODING EDITS

- Check for illogical combinations of ICD-9-CM Codes within a record
- Coding Edit Errors are identified by V flags

ETL: Data will fail the Coding Edit Program if the percentage of records with V flags is greater than 2%

# **CODING EDITS**

## **NEW EDITS - EFFECTIVE 1/1/2001**

- V0901 - Low birth weight status versus low birth weights
- V0902 - Post-term pregnancy between 40-42 weeks versus prolonged pregnancy greater than 42 weeks

# **CODING EDITS**

## **DELETED EDITS - EFFECTIVE 1/1/2001**

- V0175 - Ulceration and atherosclerosis of lower extremities
- V0212 - Use of ICD-9-CM V10 code for secondary malignancies

# CODING EDITS

## “Inactive” Edits

- The same Coding Edits that were “turned off” for 2000 data will be “turned off” for 2001 data
- See the *Coding Edit Manual* for a list of these edits

# RE-ADMISSION EDITS

Sorted by SSN, the Re-Admission Edit Program groups together all inpatient stays for the same patient

- **Checks for possible errors in patient demographics**
- **Checks for possible errors in transfers to/from different Types of Care.**

Re-Admission Edits are identified as K Flags

ETL: Data will fail the Re-Admission Edit Program if the percentage of records with K flags is greater than 2%

# EXCEPTION EDITS

- Exception Edits are **Non-Critical**: Data will not be rejected if one or more exception edits are identified
- Exception Edits are identified by X-Flags
- *Exception Edit Summary Report* displays the X-flags found in your data

# EXCEPTION EDITS

## Examples:

- X010: No ZZZZZ (Homeless ZIP Codes reported)
- X003: No E-Codes reported on your Skilled Nursing Records
- X007: 50% or more of Place of Occurrence E-Codes reported as E849.9

**Q.** How will I know if my data passed the validation and edit programs?

**A. Check Submission Status**

## SUBMISSION STATUS

Report Period: Jan 01 2001 - Jun 30 2001

Due Date: Feb 27 2002

Report Status: Data Rejected

|                               |                 |
|-------------------------------|-----------------|
| Last Submission Mode          | Test            |
| Date of Last Submission       | 2/22/2002 15:41 |
| User ID for Last Submission   | lorraines       |
| Number of Test Submissions    | 10              |
| Number of Formal Submissions  | 0               |
| Total Records                 | 30              |
| Number of Records with Errors |                 |

To view all errors in your data, click on "View Error Summary" on Main Menu

To Submit a File, View Results (of a data submission), Make Corrections, or Verify Facility Information, click on the applicable link on the Main Menu.

# **SUBMISSION STATUS MESSAGES**

## **BOTH TEST AND FORMAL SUBMISSION**

**Data Rejected ☹️**

Data failed ONE or MORE Edit Programs-- Errors are above the established ETL

## **TEST SUBMISSION**

Errors are at or below the established Error Tolerance Level (ETL) - Submit as FORMAL

## **FORMAL SUBMISSION**

**Data Approved 😊**

Data passed all Edit Programs

# RESULTS

- Check the results of your submission in 24 hours
- All Error Summary and Detail Reports will be available through MIRCAl
- At the **Main Menu** locate and select the **View Error Summary** option under **Results**
